## Declaration of Interest

Why I want to be a part of the NUS Students' Computing Club Management Committee:

In my secondary school, I have been taught the value of 饮水思源, that is to remember the source of water which I drink from. What it meant was to appreciate, remember and be grateful for the things we have taken from our environment and the people around us. Therefore, no matter which organisation I joined, I always aspire to be able to contribute in whatever way I can so as to give back as well as to value-add to the experiences of people within it.

Also, despite limited interaction with and limited participation of computing club personnel and event, I have already seen things which I want to improve, both for the club as a whole or even within the management committee. One such example was when I attended the AGM and saw how the presentation materials were very different from cell to cell. At least from an outsider's perspective, it seemed as if there was a lack of coordination and perhaps communication between cells. I hope to bring changes in these areas such that the management committee can become more efficient and effective, as well as to portray itself as a reliable and committed committee that the rest of the computing student body can look up to.

List down all skill(s)/experience(s) relevant for your intended position:

I intend to run for positions of general secretary or IT secretary.

For the general secretary role, I have extensive leadership experience within various forms of leadership bodies and have been in various leadership positions. I started as a committee member, then working my way up to the head of publicity in my secondary school, where I was put in charge of coordinating all design and publicity matters. I then too up the position of vice-president in my JC CCA, assisting my president in the management and day-to-day running of the CCA, as well as organising school-wide events and even a Service-Learning project. Finally, my most recent leadership position was as an NSF Battery Commander (company-level) during my time in the army, where I led a core command team of 2 officers and 14 specialists to ensure the training, evaluation and well-being of a 80 man strong battery. I believe that with my experience in leadership and management within organisations, I am able to effectively ensure the smooth running of, as well as to uphold a high standard, within the computing management committee.

As for the IT secretary role, I have experience coding in HTML, CSS, SASS, Javascript, PHP, MySQL. During my time in secondary school, I have coded a custom Content Management System for the council as part of an online student-run magazine initiative using a HTML/PHP front end and a MySQL backend. Recently, I have also dabbled in using the Flask module for python that could similar things as well.
