Declaration of Interest

Why I want to be a part of the NUS Students' Computing Club Management Committee:

I want to be part of the NUS Students' computing club management committee as I want to step out of my comfort zone and challenge myself to do something that I have yet to do in my education journey such as campaigning. As university is the last chance to experience the student lifestyle, I feel that I should make good use of it and try something new and at the same time widen my horizon. In addition, I would also like to play a part and contribute to the computing club by being in this committee. After experiencing all the activities organized by the committee, from the freshman orientation project to the academic day, it made me really respect and look up to the people who are organizing all these programs as they have put in so much effort to welcome all the freshmen. Personally, I really enjoyed myself throughout these programs and wishes to give back and recreate these fun filled activities for the incoming freshman next year so as to make them feel welcome and part of the computing family. I always have the passion to organize events and enjoy working with people in a team, thus being part of the committee gives me the opportunity to work with new people and at the same time forge new friendships that I believe can last throughout the 4 years in computing. There may be times where there will be conflicting opinions but I feel that as long as we can compromise and think in the shoes of one another, we will be able to overcome this and work towards the same goal in mind. All in all, I feel that being part of the committee would make my university experience a fulfilling and meaningful one, allowing me to have the total university experience and hence making this experience unlike any other ones.

List down all skill(s)/experience(s) relevant for your intended position:

(ATTACH ADDITIONAL A4-SIZED PAPER IF REQUIRED)

My cca in junior college honed my skills in organizing events as we had to organize different events and competition to host students from other schools. Hence, we had to work as a team and come up with proposals and contingency plans during the process and at the same time make a dry run in order to make sure that everything is running smoothly during the real event. I was also once the chairman of the opening and closing ceremony for one of the event that we had organized which is called heyday. During that event, I had to come up with ideas that will make the ceremony entertaining for the children who are attending the event and at the same time to draft out the script and recruiting the mcs to host the whole event. The whole process was tedious but we manage to make sure that everything was ran smoothly on the day itself.

In addition, I was also involve in overseas community involvement program in my junior college. Before travelling to the place to conduct the program which is to teach the students over there, we had to first meet up and come up with different activities that we are going to do and planned out the procedures and the flow of the event all from scratch. After all these ideas were approved, we had to purchase and prepare the materials needed and carry out a dry run of the activities in order to make sure that everything is in order before showcasing it to the students that we are teaching in Bintan.

Although the process were tedious, I had garnered and learnt different skills such as working in a team to carry out our plans efficiently, communicating effectively with my team members and teachers, sharpening my interpersonal skills, empathy, critical thinking, problem-solving, leadership and even skills such as coming up with proposals and contingency plans which I feel that it will come in handy in the committee.
