## Declaration of Interest

Why I want to be a part of the NUS Students' Computing Club Management Committee:

I want to join because I was pleasantly surprised by the proactiveness of all the seniors at orientation and even at my CS1101S lecture. Initially, I had the presumption that university life would just be studying but I inspired by the pride that I saw the seniors take in being part of Computing. The orientation was so well planned out with consideration taken for everyone's wellbeing. I find it so meaningful that the club organises academic sessions and career talks as well. The talks before school started really helped me finalise my decision and I want to be part of the club so that I can also profoundly contribute back to the faculty and my peers. Personally, I feel that it will also be an avenue for me to discover new friends and grow my self-confidence, something I feel I lack in. However, what I do know I am good at is empathising with the people around me and coming up with fresh innovative ideas. I would love to leverage on my creativity in a way that helps others. For example, I am not sure if there is already something like this in place, but I feel that we should have a 'Staff Appreciation Week' where we can organise methods for the faculty to give thanks to all the teaching and non-teaching staff members. This could be done through handwritten notes or even small flash mobs at lectures. I do believe that working together with diverse students across the faculty will further enhance the creative thought process and we can come up with great, impactful ideas to uphold the standard set by the previous committees.
