Declaration of Interest

Why I want to be a part of the NUS Students' Computing Club Management Committee:

> For more context and clarity, I should first clarify that I'm running for president.
>
> It was a really enjoyable and fulfilling experience for me organising and/or leading so many projects the past few months, so I would like to take it up a notch further to give back more, and do more for the student community. Amidst all these, I also learnt more about the Computing Club Management Committee, certain areas they're not doing well, weaknesses, needs, and most importantly, all the "we should haves". And I would like to be the one to plug all these holes and implement these "we should haves" to deliver great value to the student community next year. Briefly, I have 2 general directions I want to go in. First, externally, I strongly believe many of the rules/restrictions on the student body are unnecessary and some over the top, and among others, I would want to fight on these various matters on behalf of the students. Second, internally, I want Computing Club to be more focused to deliver superior value/benefits to the students – this does not necessarily mean doing less, but better understanding the needs of students and tailoring every project to meet the demands (aka there shouldn't be projects with low turnout, etc if we do pre-planning/surveys properly – utilise SRS more). Part of achieving this also requires the MC that works well together with as few barriers as possible (in this aspect, I would want to minimize as much as possible any potential political divide in the future MC).
